THURSDAY NOV 15, 2001 7:00 P.M.

"AERONAUTICAL CHARTS: LITTLE KNOWN FACTS"

Aeronautical charts and publications contain a wealth of information - some of it never taught, or taught but quickly forgotten - but information that can save time, money, frustration, and sometimes lives!

What's an OROCA, an MEF? Where are non-standard traffic patterns published? Which towers are charted and where? Can the Mountain Pass charted on the Sectional be used? Why should you have the latest edition? Is a subscription right for you? How will GPS affect your charts? What are the plans for new products?

Topic will be presented by Richard Nehar, National Aeronautical Charting Office and will give pilots an opportunity to ask questions and comment on the charts and publications.
